**Moshe 3000 Flex**

Expedition:

**07/04/2023**

Valid until:

**07/04/2024**

## Detalhamento:

---

Moshe 3000 acts on matter, altering the structure of the molecule and making there is no combination with water. When Moshe 3000 is added to the concrete or mortar, it alters the structure of the magnetic poles in such a way as to create the repulsion condition of the water molecule, making the structure truly hydrophobic, armored and waterproof. Moshe 3000 prevents infiltration, increases construction durability and prevents the proliferation of fungi and bacteria. Initial blue color, passing gray when dry, pasty product.

## Legal Disclaimer:
